

# MEDIA DATA 2025 SILNICE-ŽELEZNICE

# WHY SILNICE-ŽELEZNICE MAGAZINE?

SILNICE-ŽELEZNICE magazine plays a leading role among Czech and Slovak specialist publications. Thanks to the cooperation with its prestigious foreign counterparts, it includes technical and economic information and news from the field from various European countries and the rest of the world. Specialists from Czech and Slovak universities cooperate with the magazine to publish theoretical design examples. A substantial portion of the editorial team report the experiences of structural engineers, draughtsmen and other professionals. The magazine is in the list of Czech peer-reviewed periodicals maintained by the Research, Development and Innovation Council of the Government of the Czech Republic.

The editorial team reserves the right to change topics or deadlines.

Each issue of the magazine will focus on key transport projects – the highway network expansion, improvements in the quality of first-class roads, the reconstruction and increase in the capacity of existing railway tracks and the preparation of HSR tracks. We will also bring news about other transport projects such as facilities for passengers and motorists, as well as all the technology that is used within infrastructure projects.
